

# DATA MIGRATION

MARCH 8, 2013

# RECAP OF CURRENT ISSUES

- Multiple agencies submitting the same data
  - Resulting in duplicate services with different symbology

# RECAP OF CURRENT ISSUES

- Sometimes data is inaccurate
  - Happens when someone who is not the data owner submits data
- The almost 300 services has lead to performance issues

 @MDiMap

# HOW WE ARE ADDRESSING ISSUES

- Each person in GIO Office is working with their respective agencies to review data
- Examined existing services
- Identified services that could be removed or consolidated
  - Those removed were ones identified as no longer used
  - Some broken out into separate services could actually be combined
    - Example: offshore wind speed and power density speed

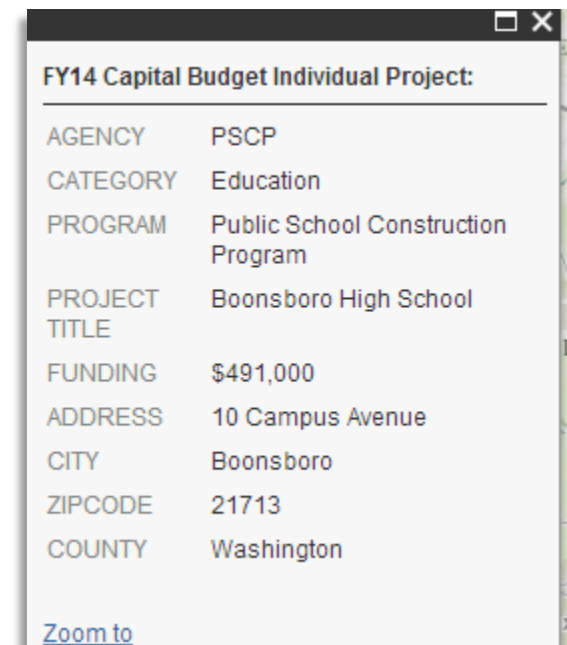

# DATA MIGRATION

As we move to 10.1 should be able to address the pop-up issue

Currently we get this
